Angela Adams, Director of Children, Youth and Families, Protective Services Division retired in February, 2009. Angela has served children and families in many capacities across her career, including as a Child Protective Services worker in Texas, as a New Mexico Children's Court Attorney, and as Division Director of Protective Services. She and her husband have further contributed to New Mexico's child welfare system through adopting two children. Among many professional achievements, Angela provided both support and inspiration for the development of this document, the *360 Degrees County Profiles*. She has led New Mexico CYFD's Protective Services utilize data to support all activities, to better target and improve child welfare programs for New Mexico's children and families.

Thank you, Angela!

Did You Know?

Incarcerated Parents and the Child Welfare System

Children in state custody with incarcerated parents represent a unique and understudied subpopulation of the child welfare system. Unfortunately, there is limited research to shed light on the characteristics of this special population. Furthermore, on a national level, there is no agreement on the percentage of children with incarcerated parents in states' custody. For example, national estimates for the percent of children in foster care with an incarcerated parent range from 6% (Hayward, 2007) to 30% (Seymour, 2001). The Children, Youth & Families Department's Research/Evaluation and FACTS Bureau was therefore motivated to examine data for children in state custody with incarcerated parents. Using data from the Adoption and Foster Care Administrative Reporting System (AFCARS) rolling 12 month file for the period ending September 30, 2008, it was found that approximately 20.3% of children in the custody of New Mexico's child welfare agency had "incarcerated parent(s)" as a condition associated with removal from home during the period (see chart above).

Many measurements of state performance associated with the deployment of the federal Round II Child and Family Services Review include only children who were in care for eight days or more. For New Mexico, a higher percentage of children in care eight days or more have an incarcerated parent (21.0%) than do children in care less than eight days (17.6%). Looking across the last four state fiscal years (SFY), for children in custody eight days or more, it is clear that in New Mexico there is a rise in the proportion of children in state custody with incarcerated parent as a condition associated with removal (see chart).

The rise reflects the increasing challenges the child welfare system is presented with, and also infers a growth in prison populations. According to the US Department of Justice, between 2000 and 2006 there was a 12.9% increase in the national prison population, and over the same time period there was a 24.3% increase in the New Mexico prison population (Sabol, Couture, & Harrison, 2007). Over the last 10 years the New Mexico Corrections Department has seen an average 3% increase per year of total inmate population in New Mexico. Even more striking is the average 5.1% increase per year over the last 10 years in inmate population for females (see chart below). This increase in incarcerated females is especially relevant for the child welfare system, as single females make up the largest proportion of caretaker family structure for children in state custody.

Incarcerated Parents and the Child Welfare System

The increase of prison populations and proportion of children in the Child Welfare Agency with incarcerated parents is compelling, as researchers have suggested that incarceration of a parent is related to higher rates of parental substance abuse (Phillips, Burns, Wagner, & Barth, 2004), along with unstable living arrangements for the family (Johnston, 1995). These notions are supported by data from New Mexico, as having an incarcerated parent is significantly correlated with other conditions associated with removal including: a) “substance abuse of parent” (alcohol and drug) and b) “inadequate housing”. Unfortunately, both substance abuse and inadequate housing have been identified by other researchers as potential roadblocks for reunification between children in the child welfare system and their parents. (Wulczyn, 2004).

Other research implies the potential for continuing risks associated with children experiencing entry into the child welfare system when the incarceration of a parent is a condition of removal from home. Specifically, authors have attempted to link the incarceration of a parent with potential negative impacts on a child, including but not limited to increased risk for juvenile delinquency and post traumatic stress disorder (Gabel & Johnston, 1995). Unfortunately, the information which could define and analyze such risks is not captured in the child welfare data presently collected. Further, a number of factors beyond the incarceration of a parent must be considered when gauging the potential risks for children in the child welfare system.

In summary, children with “incarcerated parents” as a condition associated with removal made up approximately 1/5th of the children served by CYFD Protective Services for the 12 month period ending September 30, 2008. It should be noted that many children of incarcerated parents in state custody do have positive outcomes. Rather than stigmatize children with incarcerated parents one should recognize that these children often present related unique characteristics, case complexities and associated challenges such as parental substance abuse and inadequate housing. The particular characteristics and challenges of children with incarcerated parents would benefit both from further research and perhaps targeted child welfare practice.

There were 2,541 children in the county in 2005: this represents 0.5% of the state's total children under 18. While the county accounts for 0.5% of the state's total children under 18, Quay County had 1.9% of the state's total children "in care" as of September 30, 2008, which is more than expected, based on population alone.
